PROFILE SUMMARY

- Software Engineer with 2+ years in product-based startups, owning end-to-end development of web applications from scratch using React.js and JavaScript. Focused on building scalable, intuitive products that solve business needs.

EXPERIENCE

- **VMEDULIFE SOFTWARE** — *Pune, Maharashtra*
  Software Engineer Level II — *Nov 2024 – Jun 2025*
  - Contributed to a modular campus management system based on ERP, which over 500 institutions adopted. This system streamlined academic workflows and cut manual reporting efforts by 40%.
  - Integrated payment gateways, such as **Razorpay**; this led to three times faster fee collection and a 25% drop in transaction errors.
  - Built and maintained modules for generating and printing reports dynamically, reducing administrative processing time by 50%.
  - Delivered 15+ features across six release cycles using Agile methods. This ensured steady delivery and improvement.
  - Independently built a standalone React app for the NAAC committee. This app visualized academic result analysis and included dynamic charts, customizable tables and forms, question paper generation, and a responsive UI designed from Figma. It improved the turnaround for stakeholder reporting by 60%.

- **NITYAOBJECT SOFTWARE SERVICES** — *Pune, Maharashtra*
  Jr. Software Engineer — *Jul 2023 – Oct 2024*
  - Led the front-end development of a health service web app used by over five clinics, which supports more than 1,000 users each month for online consultations and report tracking.
  - Enabled appointment scheduling and patient data management, reducing manual coordination by 70%.
  - Implemented React Router and lazy loading to improve performance, revamped authentication screens, and migrated legacy class-based components to modern function-based architecture.

  Software Engineer Intern — *Mar 2023 – Jun 2023*
  - Created reusable ReactJS components to keep branding consistent and speed up UI development by 30%.
  - Integrated REST APIs and checked endpoints with Postman, achieving 100% functional coverage for key modules.

SKILLS

Languages & Frameworks: ReactJS, JavaScript, TypeScript, Redux, HTML, CSS, Bootstrap, MUI
Tools & Platforms: Git, GitHub, JIRA, Postman, Linux
Concepts: OOP, Data Structures, RESTful APIs, State Management, Unit Testing, Performance Optimization, Responsive Web Design, Browser Debugging
Soft Skills: Collaboration, Critical Thinking, Adaptability, Eagerness to Learn, Communication

EDUCATION

- **Savitribai Phule Pune University** — *Pune, Maharashtra*
  Bachelor of Engineering - Information Technology; CGPA: 9.30/10 — *Feb 2021 – July 2023*

- **Government Polytechnic Amravati** — *Amravati, Maharashtra*
  Diploma in Computer Engineering; Aggregate: 77.94% — *July 2018 – October 2020*

PROJECT

- **Collaborative Learning Tracker**
  - A feature-rich web app designed to facilitate students and mentors collaboratively plan and track study schedules
  - The application makes use of Bootstrap for styling, React for a responsive user interface, and Socket.IO for real-time collaboration, which guarantees that changes are immediately visible to all users.
  - Deployed on Vercel with CI/CD integration, cutting the turnaround time for updates to less than five minutes per release.

CERTIFICATIONS

- **Data Structures — Dec 2022**: University of California San Diego and offered through Coursera

AWARDS & RECOGNITION

- **Star Award — Sep 2023**: Awarded for dedication and hard work in frontend solutions with a significant impact.
